

Go right to the heart of the finest sporting country—fast, safely and in a straight line—over any kind of terrain. The Sportsman M-29-S takes over where all other vehicles fail . . . in rocky foothills, spongy marshlands or in the densest river and lake areas. And the Sportsman gets you there quickly and economically. Its sure-footed tracks and boat-like buoyancy in water mean you can enjoy hunting and fishing in primitive wildlands where other people can't even get close.

For example, the Weasel Sportsman owned by the Chesapeake Bay Hooty Owl Gun Club has enabled that organization to enjoy six trouble-free years of continuous service in the tortuous jobs of carrying hunters, boats and motors to choice locations, building duck blinds, setting and retrieving decoys and patrolling their hunting areas to keep out poachers—over otherwise impassable swamp-lands.

Go Hunting . . .

Go Fishing . . .

Go Skiing . . .

Go Anywhere!

To Be Sure,

Go Weasel!

ALL MODELS OPERATE IN MUD, SNOW, AND MARSHLANDS

Check

... all these Weasel Models. One is right for You!
